MODEL 6512 SQUARE BALE HANDLER

STEFFEN SYSTEMS

Steffen Systems Bale Handlers are the toughest, longest lasting units available. Their unique opposing spring steel teeth work like a claw, having the strength to curve deep into your tightest bales, yet easily gripping even your softest hay. The sealed ball bearing tooth shaft pivots, and an all steel tubing frame makes the entire unit virtually indestructible. Our Handlers quickly mount to a variety of loaders, and require only one hydraulic remote to operate the teeth.

Attachments & Mounting Options

Standard

high lift gains up to 30 in. of stacking height

SH-ST

Extended

longer extension allows rotator to spin

SH-EX

Rigid Fork

specify model, available with pin or hook anchor
